

date	time	Room "Kleiner Kursaal"	Room "Großer Kursaal"
	12:00 - 13:50	lunch	
<b>November 29th</b>	13:50 - 14:00	Welcome	
	14:00 - 15:00	<b>Bettina Eick</b> <b>On the classification of p-groups</b> <span style="float: right;">Room: "Großer Kursaal"</span>	
	15:00 - 15:30	Matilde Manzaroli: Real fibered morphisms of real del Pezzo surfaces	Lucia Morotti: Irreducible reductions of spin representations of symmetric groups in characteristic 3
	15:30 - 16:00	coffee break	
	16:00 - 16:30	<b>Snapshot-Talks: Anja Meyer, Sonia Petschik, Vanishree Krishna Kirekod, Andrea Thevis</b> <span style="float: right;">Room: "Großer Kursaal"</span>	
	16:30 - 17:00	Chiara Meroni: The geometry of discotopes	Caroline Lassueur: On the characters of trivial source modules
	17:00 - 17:30	Irem Portakal: Graphs and toric varieties	Niamh Farrell: The generic trivial source character tables of $SL_2(q)$
	17:30 - 18:00	Victoria Schleis: Faithful tropicalizations of hyperelliptic curves	Margherita Piccolo: Representation growth of semisimple profinite groups
	18:30	dinner	
	19:30	reception <span style="float: right;">Room: "Berlin"</span>	

<b>November 30th</b>	09:00 - 10:00	<b>Marta Panizzut</b> <b>A tropical count of real bitangents to tropical plane quartic curves</b> <span style="float: right;">Room: "Großer Kursaal"</span>	
	10:00 - 10:30	Karin Schaller: Nobodies are perfect, semigroups are not	Paula Hähdnel: Permutation Groups that Act with Low Fixity: A Survey
	10:30 - 11:00	coffee break	
	11:00 - 11:30	Miruna-Stefana Sorea: Families of polytopes with rational linear precision in higher dimensions	Mima Stanojkovski: Recent developments on the Modular Isomorphism Problem
	11:30 - 12:00	Mara Belotti: The enumerative geometry of cubic hypersurfaces: point and line conditions	Agnese Gini: On the hardness of the hidden subset sum problem (online)
	12:00 - 14:30	lunch	
	14:30 - 15:00	Meirav Topol-Amram: Fundamental groups related to algebraic surfaces	Noelia Rizo: On blocks with few characters
	15:00 - 15:30	Bakul Sathaye: Boundary Rigidity for Lattices in a Product of Trees	Emily Norton: Calibrated representations of cyclotomic Hecke algebras at roots of unity
	15:30 - 16:00	Marie-Charlotte Brandenburg: Intersection Bodies of Polytopes	Eirini Chavli: The center of the generic Hecke algebra
	16:00 - 16:30	coffee break	
	16:30 - 17:00		
	17:00 - 18:00	Postersession	
	18:30	dinner	
<b>December 1st</b>	09:00 - 10:00	<b>Karen Vogtmann</b> <b>Euler characteristics of spaces of graphs</b> <span style="float: right;">Room: "Großer Kursaal" (Online)</span>	
	10:00 - 10:30	Maria Cabello Cumplido: Conjugacy stability in Artin groups	Isabel Stenger: On the numerical dimension of Calabi-Yau 3-folds of Picard number 2 (Online)
	10:30 - 11:00	coffee break	
	11:00 - 11:30	Alheydis Geiger: Towards counting tropical binodal surfaces	Karthika Rajeev: On the Basilica operation (online)
	11:30 - 12:00	Claudia Fevola: Likelihood Degenerations	
	12:00 - 12:30		
	12:30 Uhr	lunch/end of conference
